***Fillings***

- When anesthetic has been used, your lips, teeth, and tongue may be numb for several hours after the appointment. Avoid any chewing until the numbness has completely worn off.
- It's normal to experience some hot, cold and pressure sensitivity after your appointment. Your gums may be sore for several days. Rinse three times a day with warm salt water (~ 1 tsp. of table salt in a cup of warm water, rinse-swish-spit) to reduce pain and swelling.
- You may chew right away on white fillings, since they set completely on the day of your appointment.
- If your bite feels uneven, if you have persistent pain, or if you have any other questions or concerns, please call our office.
